Members on the (Blog)Spot is a monthly feature of member businesses of the Clive Chamber of Commerce. If you are interested in having your business featured, contact kschmidt@clivechamber.org.

- Electronic Office, LLC has been programming, installing, and repairing point-of-sale systems and cash registers since 1972. This includes online ordering, in addition to integrated credit card processing solutions.
- Their office primarily works with the hospitality industry but also serves many specialty retail stores. What really sets Electronic Office apart from their competitors is their practice of working with multiple systems, rather than just specializing in one. This allows them to find the best fit for their customers' needs and budget, instead of a one-size-fits-all approach. Being a small, family-owned company has enabled Electronic Office to empathize and understand the unique challenges that small businesses face, and they take great pride in helping their customers overcome those obstacles to compete with the larger competitors.
- Electronic Office joined the Chamber in 2021 in hopes of increasing their visibility in the community, as well as partaking in the many networking opportunities that the chamber has to offer!
- The company started in the 1970's selling office machines such as faxes and copiers. Under new ownership (the current owner's father) in the 90's, the company transitioned to focus more on the current point of sale and credit card processing offerings. In July of 2019, Erik inherited the business from his father and continues to operate it. Erik's favorite part about his business is "working with other small businesses through the challenges they face and helping them remain competitive in their market."
- As a newer member of the Clive Chamber, Erik and Electronic Office aim to be an active member of the community. You can reach their office by phone at 515.244.4155 or by email at erik@electronicbiz.com. Be sure to connect with Erik and welcome his team to the Clive Chamber!
